to Ian, me

Good morning Cathy,

The google [drive](#) has been updated with the revised application, site plan and work area maps. These revisions include:

- Spring Brook sampling location added to site plan (pg. 11)
- Previous years work areas figure added (pg. 13)
- Legend for shot summary & seismograph summary table headers (pg. 19)
- Historical data of well levels added (pg. 30)
- Chart of charts returned pg. (35)
  - Please note last year we switched to a bulk explosive which is a denser product, thus the increase in pounds of explosives chart only.

We also clarified the FB & PB labels on the Spring Brook sampling (pg. 12 of the SME Water Quality Results file) stand for field blank and pump equipment blank sampling quality control.

Please let us know any other questions or concerns.
