to me, 1st, 2nd, 3rd, Alna

Section 1. A.

If the Project is less than 1 Acre (or 1/2 Acre for production blasting)  
is the landowner

1. allowed to blast without a permit?
2. without a licensed explosives professional?
3. without notifying abutters?
4. without a set amount of explosives?
5. without signage that blasting will be occurring, and when, etc.?

If Yes, Why would this be allowed?

Also this ordinance states 250ft from a structure on an adjacent parcel. Shouldn't this guideline of distance be from the property line of the adjacent parcel? As this is written, couldn't blasting be next to the property line? Animals could be pastured within this area leading up to the 250ft, with or without a structure, or kids could be playing, or a well, or an in ground root cellar or ? Why would this be allowed?

Thank you for your time,

Deborah Brown
